PROBLEM

(Quadratic Forms Q2.19) Find the roots of $4x^2 + 3x + 5 = 0$.

SOLUTION

The given equation can be written as,

$$\mathbf{x}^T \begin{pmatrix} 4 & 0 \\ 0 & 0 \end{pmatrix} \mathbf{x} + \begin{pmatrix} 3 & 0 \end{pmatrix} \mathbf{x} + 5 = 0 \quad (0.0.1)$$

where,

$$\mathbf{x} = \begin{pmatrix} x \\ 0 \end{pmatrix} \quad (0.0.2)$$

Substituting (0.0.2) in (0.0.1),

$$\begin{pmatrix} x \\ 0 \end{pmatrix}^T \begin{pmatrix} 4 & 0 \\ 0 & 0 \end{pmatrix} \begin{pmatrix} x \\ 0 \end{pmatrix} + \begin{pmatrix} 3 & 0 \end{pmatrix} \begin{pmatrix} x \\ 0 \end{pmatrix} + 5 = 0 \quad (0.0.3)$$

$$\implies 4x^2 + 3x + 5 = 0 \quad (0.0.4)$$

$$\implies \left(x - \left(\frac{-3}{8} \right) \right) \left(x - \left(\frac{-3}{8} \right) \right) = 0 \quad (0.0.5)$$

$$\implies x = \left(\frac{-3}{8} \right), \left(\frac{-3}{8} \right) \quad (0.0.6)$$

From 0, we can see that the function does not cross the x-axis, so, the quadratic equation has no real roots. The roots which we got are complex roots.
